

**TO:** Honorable Members of the Assembly Appropriations Committee

**FROM:** Marci Hamilton, Founder & CEO, CHILD USA; Professor, University of Pennsylvania, and Kathryn Robb, Executive Director, CHILD USA Advocacy

**RE:** AB 1547, creating a 1-year revival window for child sexual abuse claims for assault by employees of juvenile probation camps or detention facilities

**DATE:** May 17, 2023

---

Dear Honorable Members of the Assembly Appropriations Committee,

Thank you for allowing us to submit testimony in support of AB 1547, which will open a 1-year revival window for child sexual abuse (“CSA”) claims arising from abuse by an employee of a juvenile detention facility. This legislation will not only bring long overdue justice to survivors, but it will also greatly reduce the present danger to children in California by exposing hidden predators who are still abusing children today.

By way of introduction, Professor Marci Hamilton is a First Amendment constitutional scholar at the University of Pennsylvania who has led the national movement to reform statutes of limitations to reflect the science of delayed disclosure of childhood sexual abuse and who founded CHILD USA, a national nonprofit think tank devoted to ending child abuse and neglect. Kathryn Robb is the Executive Director of CHILD USA Advocacy, an advocacy organization dedicated to protecting children’s civil liberties and keeping children safe from abuse and neglect. Kathryn is also an outspoken survivor of child sex abuse.

**I. Research on Trauma and Delayed Disclosure Supports SOL Reform for Child Sexual Abuse**

**A. There is a Nationwide Epidemic of CSA Causing Lifelong Damage to Victims**

Currently, more than 10% of children are sexually abused, with at least one in five girls and one in thirteen boys sexually abused before they turn 18.<sup>1</sup> CSA is a social problem that occurs in all social groups and institutions, including familial, religious, educational, medical, and athletic. Nearly 90% of CSA perpetrators are someone the child knows; in fact, roughly one third of CSA offenses are committed by family members.<sup>2</sup>

The trauma stemming from CSA is complex and individualized, and it impacts victims throughout their lifetimes:<sup>3</sup>

- Childhood trauma, including CSA, can have **devastating impacts on a child’s brain**,<sup>4</sup> including disrupted neurodevelopment; impaired social, emotional, and cognitive development; psychiatric and physical disease, such as post-traumatic stress disorder (PTSD)<sup>5</sup>; and disability.<sup>6</sup>

- CSA victims suffer an **increased risk of suicide**—in one study, female CSA survivors were two to four times more likely to attempt suicide, and male CSA survivors were four to 11 times more likely to attempt suicide.<sup>7</sup>
- CSA leads to an increased risk of **negative outcomes across the lifespan**, such as alcohol problems, illicit drug use, depression, marriage issues, and family problems.<sup>8</sup>

## B. CSA Victims Commonly Delay Disclosure of Their Abuse for Decades

Many victims of CSA suffer in silence for decades before they talk to anyone about their traumatic experiences. As children, CSA victims often fear the negative repercussions of disclosure, such as disruptions in family stability, loss of relationships, or involvement with the authorities.<sup>9</sup> Additionally, CSA survivors may struggle to disclose because of trauma and psychological barriers such as shame and self-blame, as well as social factors like gender-based stereotypes or the stigma surrounding victimization.<sup>10</sup> Further, many injuries resulting from CSA do not manifest until survivors are well into adulthood. These manifestations may coincide with difficulties in functioning and a further delay in disclosure of abuse.

Moreover, disclosure of CSA to the authorities for criminal prosecution or an attorney in pursuit of civil justice is a difficult and emotionally complex process, which involves the survivor knowing that he or she was abused, being willing to identify publicly as an abuse survivor, and deciding to act against their abuser. In light of these barriers to disclosure, it is not surprising that:

- In a study of survivors of abuse in Boy Scouts of America, **51%** of survivors disclosed their abuse for the first time at **age 50 or older**.
- An estimated **70%** of child sexual assault victims **never contact police** to report abuse.
- **One-third** of CSA survivors **never report** their abuse to anyone.

For both children and adults, disclosure of CSA trauma is a process and not a discrete event in which a victim comes to terms with their abuse.<sup>11</sup> To effectively protect children from abuse, SOL laws must reflect this reality.

## II. SOL Reform Serves the Public Good by Giving Survivors Access to Justice and Preventing Future Abuse

Historically, a wall of ignorance and secrecy has been constructed around CSA, which has been reinforced by short SOLs that kept victims out of the legal system. Short SOLs for CSA play into the hands of the perpetrators and the institutions that cover up for them; they disable victims' voices and empowerment and leave future children vulnerable to preventable sexual assault.

CHILD USA and CHILD USAadvocacy are leading the vibrant national and global movement to eliminate civil and criminal SOLs and revive expired civil claims as a systemic solution to the preventable CSA epidemic.<sup>12</sup> **There are three compelling public purposes served by the child sexual abuse SOL reform movement**, which are explained in the graphic below:

# HOW STATUTE OF LIMITATIONS REFORM HELPS EVERYONE

## Identifies Hidden Child Predators and the Institutions that Endanger Children

to the public, shielding other children from future abuse.

## Punishes Bad Actors & Shifts the Cost of Abuse

from the victims and taxpayers to those who caused it.

## Prevents Further Abuse

by educating the public about the prevalence, signs, and impact of child sex abuse so that it can be prevented in the future.

### A. SOL Reform Identifies Hidden Child Predators and Institutions that Endanger Children

It is in society's best interest to have sex abuse survivors identify hidden child predators to the public—whenever the survivor is ready. The decades before public disclosure give perpetrators and institutions wide latitude to suppress the truth to the detriment of children, parents, and the public. Some predators abuse a high number of victims and continue abusing children well into their elderly years. For example, one study found that 7% of offenders sampled committed offenses against 41 to 450 children, and the highest time between offense to conviction was 36 years.<sup>13</sup> SOL reform helps protect California's children by identifying sexual predators in our midst. By eliminating, and reviving short restrictive SOLs, especially allowing claims for past abuse to be brought to court, hidden predators are brought into the light and are prevented from further abusing more children in California.

### B. SOL Reform Stops Perpetrators from Abusing More Children

Criminal SOL reform is critical to child protection because perpetrators of CSA remain a threat throughout their lives. Unlike other types of criminal offenders, the recidivism risk of child sex abusers does not significantly decrease merely by the passage of time. A study of 91 child sex offenders found that 30% had 10 or more victims, 23% had committed offenses against 10 to 40 children, and 7% had committed offenses against 41 to 450 children. Moreover, **55% reported that their offenses became more serious over time.** For example, when the *Boston Globe* shed

light on the Boston Archdiocese’s cover-up of child sex abuse in 2002, we learned about one of the most harmful priests, John Geoghan, who was sexually abusing children well into his 80s. Thus, even a victim who is in middle age can protect other children from sex abuse by pressing charges.

When short SOLs prevent the state from prosecuting historical cases of abuse, child abusers are not convicted, and they do not enter the sex offender registry thus leaving predators free to access professional and volunteer positions that require close contact with children. Short SOLs are a procedural “loophole” that undermines the effectiveness of legislation aimed at protecting children. Short criminal SOLs diminish the certainty of punishment and permit perpetrators’ identities to remain hidden, enabling them to continue their reign of horror in perpetuity. This is a zero-sum game where denying victims justice correspondingly frees up pedophiles to pursue more children.

### **C. SOL Reform Prevents Further Abuse**

SOL reform also educates the public about the dangers of CSA and how to prevent it. When predators and institutions are exposed, particularly high-profile ones like Larry Nassar, Jeffrey Epstein, the Boy Scouts of America, and the Catholic Church, the media publish investigations and documentaries that enlighten the public about the insidious ways child molesters operate to sexually assault children and the institutional failures that enabled their abuse.<sup>14</sup> By shedding light on the problem, parents and other guardians are better able to identify abusers and responsible institutions, while the public is empowered to recognize grooming and abusive behavior and pressure youth serving organizations to implement prevention policies to report abuse in real time. Indeed, CSA publicity creates more social awareness to help keep kids safe, while also encouraging institutions to implement accountability and safe practices.

## **III. California Should Join the National Trend Toward SOL Reform for CSA**

The gold standard of the SOL reform movement for CSA is for states to eliminate civil and criminal SOLs and revive expired civil claims—like Vermont, Maine, Guam, and NMI have already done. California has made some progress but falls short in its protection of children and should join the two-dozen states across the U.S. and three territories have revival laws giving survivors an opportunity to file claims for decades old abuse that were blocked by short SOLs. California is lagging behind with its short SOL for civil claims.

CHILD USA and CHILD USA Advocacy are proud to have played a major role working with bipartisan leaders on a new federal law eliminating the SOL for over a dozen federal civil CSA claims and permitting victims to bring a lawsuit against perpetrators and institutions for compensation for their injuries. 18 U.S.C. § 2255. “The science of trauma is clear: it often takes years for victims to come forward,” stated Senator Richard Durbin (D-Ill.), the sponsor of the bill. Co-sponsor Senator Marsha Blackburn (R-Tenn.) correctly pointed out that “[t]he statute of limitations for sexual abuse offenses should never prohibit young survivors from getting the justice they deserve.”

### **A. California Should Eliminate Civil SOLs**

Currently, California’s civil SOL for CSA claims expire when victims reach age 40 or 5 years after discovering their injuries. As shown in the graphic below, **California’s civil SOL ranks among the worst in the country.**

In contrast, as you can see below, **seventeen U.S. states and territories, along with the federal government, have already abolished their age cap for many CSA claims.** The worst states and territories with age limits that block claims when victims are in their 40’s are out of touch with science and the realities child sex abuse trauma.

These bills’ civil elimination would improve California’s SOL significantly. It is in line with the recent federal changes and the overall trend to give older victims more time to come forward in accordance with the delayed disclosure of abuse science.

### **B. California Should Revive All Expired Claims**

California was the first state to open a revival window for CSA claims, with a 1 year window in 2003. California must continue to work to uphold its reputation for child protection and expose hidden predators. There is only one way to restore justice to California’s CSA survivors blocked from pursuing their claims by unfairly short SOLs—to revive their expired civil claims. Revival laws are not solely about justice for victims; there are also important public safety reasons for allowing older claims of abuse to proceed. When victims are empowered to disclose their abuse and sue for their injuries, the public benefits from finding out who the perpetrators are, the cost of abuse is shifted to those who created it, and it learns how to prevent CSA.

California currently has a confusing patchwork of civil SOLs for CSA that has helped few survivors and left most without meaningful recourse for their injuries. Up until 2002, CSA survivors were blocked from filing suit after their 26<sup>th</sup> birthday. In 2019, the legislature acknowledged this was not nearly enough time, amending the SOL to give survivors until age 40 or 5 years from discovery of their injuries to sue all those responsible for their abuse. The legislature also opened a 3-year revival window for CSA survivors starting on January 1, 2020. While California has made some progress, many adult survivors are still shut out of the courts and institutions that enabled rampant CSA have yet to be held accountable.

As you can see in the graphic below, California’s age 40 revival law was helpful to survivors, but must be extended.

The jurisdictions that have revived expired civil SOLs more broadly have gained valuable information about hidden child predators and the institutions that harbored them, enabling them to better empower victims. These revival laws do not yield a high number of cases, but instead provide long-overdue justice to older victims of child sex abuse. They also address the systemic issue of institutional CSA, which occurs with alarming frequency in athletic institutions, youth-serving organizations, medical facilities, and religious groups. Without institutional accountability for enabling or turning a blind eye to child sex abuse, the children these institutions serve remain at risk. This bill will incentivize youth serving organizations to implement prevention policies and take action to immediately report abuse and safeguard victims and other children. A revival window sends a strong message that the state will not tolerate “passing the trash” or looking the other way when a person is raping or molesting a child in their midst.

With AB 1547, California can remove additional barriers to civil justice for some survivors, those who were abused in juvenile detention facilities. AB 1547 will give those survivors the time they need to do the legal and emotional work necessary to revisit their childhood traumas and coordinate with attorneys to file their cases. If there is sufficient evidence to prove civil liability, the mere passage of time should never prevent survivors from accessing justice.

#### IV. Conclusion

Once again, we commend you for supporting this legislation, which is desperately needed to validate adult survivors of CSA and protect California children from preventable sexual abuse. Eliminating the civil SOL and reviving expired claims is a positive step for California's children and families.
