

**TO:** Honorable Members of the Senate Judiciary Committee

**FROM:** Marci Hamilton, Founder & CEO, CHILD USA; Professor, University of Pennsylvania, and Kathryn Robb, Executive Director, CHILD USA Advocacy

**RE:** SCR001

**DATE:** February 5, 2024

---

Dear Honorable Members of the Senate Judiciary Committee,

Thank you for allowing us to submit testimony in support of SCR001, which will clarify and permit the retroactive application of laws passed by this legislature that permit child sexual abuse (“CSA”) victims to bring claims for abuse perpetrated while the victim was a minor. As you know, this legislature passed the CSA Accountability Act in 2021, which created a new cause of action and opened a 3-year revival window for sexual misconduct against minors occurring between 1960-2021, including CSA and trafficking offenses. The Colorado Supreme Court held this necessary Act unconstitutional this past summer, holding that the retroactive application of the new cause of action was violative of the Colorado Constitution’s retrospectivity clause. SCR001 will empower Colorado voters to amend the state constitution to permit such essential protection of Colorado’s children by exposing hidden predators who are still abusing children today.

By way of introduction, Professor Marci Hamilton is a First Amendment constitutional scholar at the University of Pennsylvania who has led the national movement to reform statutes of limitations to reflect the science of delayed disclosure of childhood sexual abuse and who founded CHILD USA, a national nonprofit think tank devoted to ending child abuse and neglect. Kathryn Robb is the Executive Director of CHILD USA Advocacy, an advocacy organization dedicated to protecting children’s civil liberties and keeping children safe from abuse and neglect. Kathryn is also an outspoken survivor of child sex abuse.

**I. Research on Trauma and Delayed Disclosure Supports SOL Reform for Child Sexual Abuse**

**A. There is a Nationwide Epidemic of CSA Causing Lifelong Damage to Victims**

Currently, more than 10% of children are sexually abused, with at least one in five girls and one in thirteen boys sexually abused before they turn 18.<sup>1</sup> CSA is a social problem that occurs in all social groups and institutions, including familial, religious, educational, medical, and athletic. Nearly 90% of CSA perpetrators are someone the child knows; in fact, roughly one third of CSA offenses are committed by family members.<sup>2</sup>

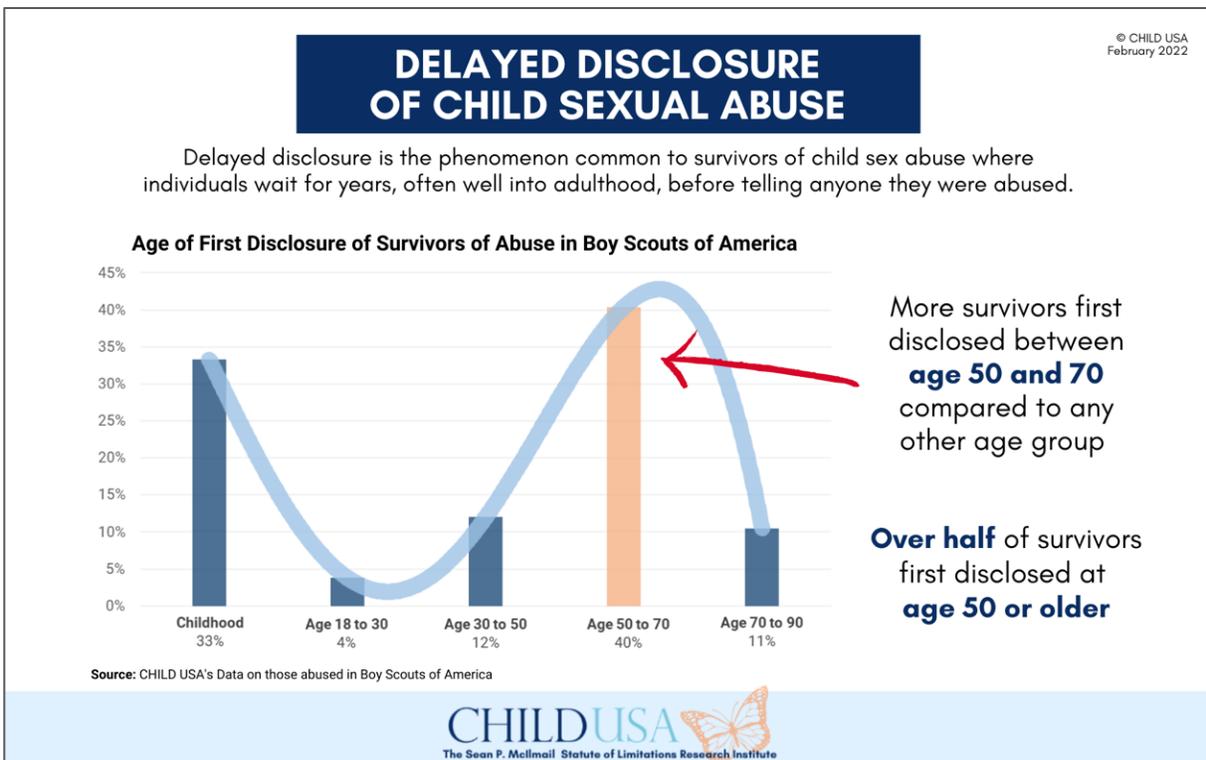

The trauma stemming from CSA is complex and individualized, and it impacts victims throughout their lifetimes:<sup>3</sup>

- Childhood trauma, including CSA, can have **devastating impacts on a child’s brain**,<sup>4</sup> including disrupted neurodevelopment; impaired social, emotional, and cognitive development; psychiatric and physical disease, such as post-traumatic stress disorder (PTSD)<sup>5</sup>; and disability.<sup>6</sup>
- CSA victims suffer an **increased risk of suicide**—in one study, female CSA survivors were two to four times more likely to attempt suicide, and male CSA survivors were four to 11 times more likely to attempt suicide.<sup>7</sup>
- CSA leads to an increased risk of **negative outcomes across the lifespan**, such as alcohol problems, illicit drug use, depression, marriage issues, and family problems.<sup>8</sup>

## B. CSA Victims Commonly Delay Disclosure of Their Abuse for Decades

Many victims of CSA suffer in silence for decades before they talk to anyone about their traumatic experiences. As children, CSA victims often fear the negative repercussions of disclosure, such as disruptions in family stability, loss of relationships, or involvement with the authorities.<sup>9</sup> Additionally, CSA survivors may struggle to disclose because of trauma and psychological barriers such as shame and self-blame, as well as social factors like gender-based stereotypes or the stigma surrounding victimization.<sup>10</sup> Further, many injuries resulting from CSA do not manifest until survivors are well into adulthood. These manifestations may coincide with difficulties in functioning and a further delay in disclosure of abuse.

Moreover, disclosure of CSA to the authorities for criminal prosecution or an attorney in pursuit of civil justice is a difficult and emotionally complex process, which involves the survivor knowing

that he or she was abused, being willing to identify publicly as an abuse survivor, and deciding to act against their abuser. In light of these barriers to disclosure, it is not surprising that:

- In a study of survivors of abuse in Boy Scouts of America, **51%** of survivors disclosed their abuse for the first time at **age 50 or older**.
- An estimated **70%** of child sexual assault victims **never contact police** to report abuse.
- **One-third** of CSA survivors **never report** their abuse to anyone.

For both children and adults, disclosure of CSA trauma is a process and not a discrete event in which a victim comes to terms with their abuse.<sup>11</sup> To effectively protect children from abuse, SOL laws must reflect this reality.

## II. SOL Reform Serves the Public Good by Giving Survivors Access to Justice and Preventing Future Abuse

Historically, a wall of ignorance and secrecy has been constructed around CSA, which has been reinforced by short SOLs that kept victims out of the legal system. Short SOLs for CSA play into the hands of the perpetrators and the institutions that cover up for them; they disable victims' voices and empowerment and leave future children vulnerable to preventable sexual assault.

CHILD USA and CHILD USAAdvocacy are leading the vibrant national and global movement to eliminate civil and criminal SOLs and revive expired civil claims as a systemic solution to the preventable CSA epidemic.<sup>12</sup> **There are three compelling public purposes served by the child sexual abuse SOL reform movement**, which are explained in the graphic below:

## HOW STATUTE OF LIMITATIONS REFORM HELPS EVERYONE

**Identifies Hidden Child Predators and the Institutions that Endanger Children**  
to the public, shielding other children from future abuse.

**Punishes Bad Actors & Shifts the Cost of Abuse**  
from the victims and taxpayers to those who caused it.

**Prevents Further Abuse**  
by educating the public about the prevalence, signs, and impact of child sex abuse so that it can be prevented in the future.

### **A. SOL Reform Identifies Hidden Child Predators and Institutions that Endanger Children**

It is in society's best interest to have sex abuse survivors identify hidden child predators to the public—whenever the survivor is ready. The decades before public disclosure give perpetrators and institutions wide latitude to suppress the truth to the detriment of children, parents, and the public. Some predators abuse a high number of victims and continue abusing children well into their elderly years. For example, one study found that 7% of offenders sampled committed offenses against 41 to 450 children, and the highest time between offense to conviction was 36 years.<sup>13</sup> SOL reform helps protect Colorado's children by identifying sexual predators in our midst. By reviving short restrictive SOLs and allowing claims for past abuse to be brought to court, hidden predators are brought into the light and are prevented from further abusing more children in Colorado.

### **B. SOL Reform Prevents Further Abuse**

SOL reform also educates the public about the dangers of CSA and how to prevent it. When predators and institutions are exposed, particularly high-profile ones like Larry Nassar, Jeffrey Epstein, the Boy Scouts of America, and the Catholic Church, the media publish investigations and documentaries that enlighten the public about the insidious ways child molesters operate to sexually assault children and the institutional failures that enabled their abuse.<sup>14</sup> By shedding light on the problem, parents and other guardians are better able to identify abusers and responsible institutions, while the public is empowered to recognize grooming and abusive behavior and pressure youth serving organizations to implement prevention policies to report abuse in real time. Indeed, CSA publicity creates more social awareness to help keep kids safe, while also encouraging institutions to implement accountability and safe practices.

### **III. Colorado Should Submit SCR001 to Voters to Permit Revival of Expired Claims**

There is only one way to restore justice to Colorado's CSA survivors blocked from pursuing their claims by unfairly short SOLs—to revive their expired civil claims. Revival laws are not solely about justice for victims; there are also important public safety reasons for allowing older claims of abuse to proceed. When victims are empowered to disclose their abuse and sue for their injuries, the public benefits from finding out who the perpetrators are, the cost of abuse is shifted to those who created it, and it learns how to prevent CSA.

Colorado is a national leader with respect to civil SOLs for CSA. Until 2021, CSA survivors were blocked from filing suit after their 20<sup>th</sup> or 24<sup>th</sup> birthday, depending on if the defendant was a person or entity. In 2021, the legislature acknowledged this was not nearly enough time, amending the SOL to remove the age cap and permit survivors to sue all those responsible for their abuse at any time. While the SOL elimination was a helpful step forward, it left survivors of abuse prior to that law change without recourse, which is why this legislature enacted the CSA Accountability Act. That Act created a new cause of action and opened a 3-year window for any sexual misconduct against minors between 1960-2021. The Colorado Supreme Court held this necessary Act unconstitutional this past summer, holding that the retroactive application of the new cause of action was violative of the Colorado Constitution's retrospectivity clause. Submitting SCR001 to the Colorado voters will empower them to amend the state constitution to permit such essential

protection of Colorado’s children by exposing hidden predators who are still abusing children today.

As you can see in the graphic below, Colorado’s legislature was not alone in seeking to grant such revival relief to CSA survivors, and the Constitutional Amendment proposed by SCR001 will place Colorado in a comparable revival law position to many other states, including nearby Arizona and Montana.

#### IV. Conclusion

Once again, we commend you for supporting this amendment, which is desperately needed to validate adult survivors of CSA and protect Colorado’s children from preventable sexual abuse. Reviving expired claims is a positive step for Colorado’s children and families. For more information about SOL reform, visit [childusa.org/sol/](http://childusa.org/sol/) or email [info@childusa.org](mailto:info@childusa.org). Please do not hesitate to contact us if you have questions regarding SOL reform or if we can be of assistance in any way on other child protection issues.

Sincerely,
