RE: SB18 – Eliminating and reviving the civil SOL for child sex abuse claims against an entity against a bankruptcy estate

DATE: February 21 2024

Dear Honorable Members of the Senate Corrections and Criminal Law Committee,

Thank you for allowing us to submit testimony in support of SB18, which will eliminate and revive the civil statute of limitation (“SOL”) for child sexual abuse (“CSA”) claims against bankruptcy estates. This legislation will not only bring long overdue justice to survivors, but it will also greatly reduce the present danger to children in Alabama by exposing hidden predators who are still abusing children today.

This pressing reform is needed to make bankruptcy cases less re-traumatizing to the victims and to serve the public’s interest in learning how institutions endanger our children. The foundational principle that should drive bankruptcy law in these cases is that child sex abuse victims suffer individualized trauma and damage. **The bankruptcy system, as it is now situated, is ill-suited for child sex abuse victims to obtain justice.**

By way of introduction, Professor Marci Hamilton is a First Amendment constitutional scholar at the University of Pennsylvania who has led the national movement to reform statutes of limitations to reflect the science of delayed disclosure of childhood sexual abuse and who founded CHILD USA, a national nonprofit think tank devoted to ending child abuse and neglect. Kathryn Robb is the Executive Director of CHILD USA Advocacy, an advocacy organization dedicated to protecting children’s civil liberties and keeping children safe from abuse and neglect. Kathryn is also an outspoken survivor of child sex abuse.

I. Research on Trauma and Delayed Disclosure Supports SOL Reform for Child Sexual Abuse

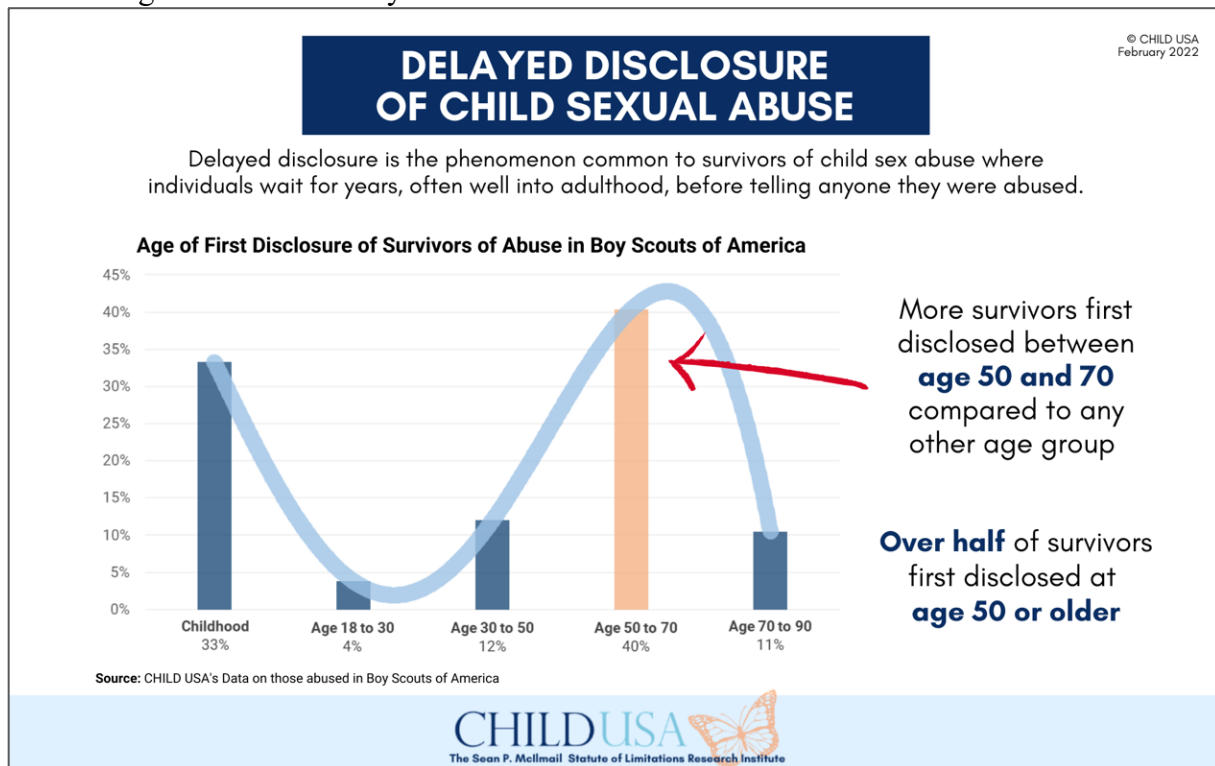

A. There is a Nationwide Epidemic of CSA Causing Lifelong Damage to Victims

Currently, more than 10% of children are sexually abused, with at least one in five girls and one in thirteen boys sexually abused before they turn 18.¹ CSA is a social problem that occurs in all social groups and institutions, including familial, religious, educational, medical, and athletic. Nearly 90% of CSA perpetrators are someone the child knows; in fact, roughly one third of CSA offenses are committed by family members.² The trauma stemming from CSA is complex and individualized, and it impacts victims throughout their lifetimes.³

- Childhood trauma, including CSA, can have **devastating impacts on a child's brain**,⁴ including disrupted neurodevelopment; impaired social, emotional, and cognitive development; psychiatric and physical disease, such as post-traumatic stress disorder (PTSD)⁵; and disability.⁶
- CSA victims suffer an **increased risk of suicide**—in one study, female CSA survivors were two to four times more likely to attempt suicide, and male CSA survivors were four to 11 times more likely to attempt suicide.⁷
- CSA leads to an increased risk of **negative outcomes across the lifespan**, such as alcohol problems, illicit drug use, depression, marriage issues, and family problems.⁸

B. CSA Victims Commonly Delay Disclosure of Their Abuse for Decades

Many victims of CSA suffer in silence for decades before they talk to anyone about their traumatic experiences. As children, CSA victims often fear the negative repercussions of disclosure, such as disruptions in family stability, loss of relationships, or involvement with the authorities.⁹ Additionally, CSA survivors may struggle to disclose because of trauma and psychological barriers such as shame and self-blame, as well as social factors like gender-based stereotypes or the stigma surrounding victimization.¹⁰ Further, many injuries resulting from CSA do not manifest until survivors are well into adulthood. These manifestations may coincide with difficulties in functioning and a further delay in disclosure of abuse.

Moreover, disclosure of CSA to the authorities for criminal prosecution or an attorney in pursuit of civil justice is a difficult and emotionally complex process, which involves the survivor knowing that he or she was abused, being willing to identify publicly as an abuse survivor, and deciding to act against their abuser. In light of these barriers to disclosure, it is not surprising that:

- In a study of survivors of abuse in Boy Scouts of America, **51%** of survivors disclosed their abuse for the first time at **age 50 or older**.
- An estimated **70%** of child sexual assault victims **never contact police** to report abuse.
- **One-third** of CSA survivors **never report** their abuse to anyone.

For both children and adults, disclosure of CSA trauma is a process and not a discrete event in which a victim comes to terms with their abuse.¹¹ To effectively protect children from abuse, SOL laws must reflect this reality.

II. SOL Reform Serves the Public Good by Giving Survivors Access to Justice and Preventing Future Abuse

Historically, a wall of ignorance and secrecy has been constructed around CSA, which has been reinforced by short SOLs that kept victims out of the legal system. Short SOLs for CSA play into the hands of the perpetrators and the institutions that cover up for them; they disable victims' voices and empowerment and leave future children vulnerable to preventable sexual assault.

CHILD USA and CHILD USAAdvocacy are leading the vibrant national and global movement to eliminate civil and criminal SOLs and revive expired civil claims as a systemic solution to the preventable CSA epidemic.¹² **There are three compelling public purposes served by the child sexual abuse SOL reform movement**, which are explained in the graphic below:

HOW STATUTE OF LIMITATIONS REFORM HELPS EVERYONE

Identifies Hidden Child Predators and the Institutions that Endanger Children
to the public, shielding other children from future abuse.

Punishes Bad Actors & Shifts the Cost of Abuse
from the victims and taxpayers to those who caused it.

Prevents Further Abuse
by educating the public about the prevalence, signs, and impact of child sex abuse so that it can be prevented in the future.

B. SOL Reform Prevents Further Abuse

SOL reform also educates the public about the dangers of CSA and how to prevent it. When predators and institutions are exposed, particularly high-profile ones like the Boy Scouts of

America, the media publish investigations and documentaries that enlighten the public about the insidious ways child molesters operate to sexually assault children and the institutional failures that enabled their abuse.¹³ By shedding light on the problem, parents and other guardians are better able to identify abusers and responsible institutions, while the public is empowered to recognize grooming and abusive behavior and pressure youth serving organizations to implement prevention policies to report abuse in real time. Indeed, CSA publicity creates more social awareness to help keep kids safe, while also encouraging institutions to implement accountability and safe practices.

The application of bankruptcy laws can re-traumatize CSA victims while it shelters the institution that has endangered children. It also derails the public search for the truth about widespread child sex abuse by short-circuiting discovery and shifting the attention from the victims and systemic failures to the financial needs of the institution. Bankruptcy law was never intended to be the clearinghouse for the coverup of child sex abuse. This playing field needs to be leveled for the sake of the victims, their families, and the public.

III. Conclusion

Once again, we commend you for supporting this legislation, which is desperately needed to validate adult survivors of CSA and protect Alabama's children from preventable sexual abuse. Eliminating and reviving the SOL for CSA claims against bankruptcy estates is a positive step for Alabama's children and families. For more information about SOL reform, visit childusa.org/sol/ or email info@childusa.org. Please do not hesitate to contact us if you have questions regarding SOL reform or if we can be of assistance in any way on other child protection issues.

Sincerely,
