

TO: Honorable Members of the Senate Judiciary Committee

FROM: Marci Hamilton, Founder & CEO, CHILD USA; Professor, University of Pennsylvania

RE: HB 531: Enact Braden's Law to prohibit sexual extortion

DATE: November 18, 2024

Dear Honorable Members of the Senate Judiciary Committee,

Thank you for allowing me to submit testimony in support of HB 531, which will include aggravated sexual extortion in claims based on “criminally injurious conduct” and provide a statute of limitation (“SOL”) that will apply retroactively to previously barred claims. This legislation will not only bring long overdue justice to survivors of child sexual abuse and exploitation (“CSAE”), but will also greatly reduce the present danger to children in Ohio by exposing hidden predators who continue extorting children today.

By way of introduction, Professor Marci Hamilton is a First Amendment constitutional scholar at the University of Pennsylvania. She has led the national movement to reform statutes of limitations to reflect the science of delayed disclosure of childhood sexual abuse. Hamilton founded CHILD USA, a national nonprofit think tank devoted to ending child abuse and neglect.

I. Research on Trauma and Delayed Disclosure Supports SOL Reform for Child Sexual Abuse and Exploitation

A. There is a Nationwide Epidemic of Child Sexual Abuse Causing Lifelong Damage to Victims

Currently, more than 10% of children are sexually abused, with at least one in five girls and one in thirteen boys sexually abused before they turn 18.¹ Online CSAE has increased by 422% over the last 15 years.² Millions of individual users consume more than 15 million child sexual abuse images (“CSAM”) in a market currently valued between \$3 and \$20 billion dollars annually.³ Unfortunately, there are no signs that the market is slowing down.

Tragically, the demand for CSAM has reached epidemic proportions in recent years. The COVID-19 crisis created a “perfect storm” for CSAM to proliferate as children spent more, often unsupervised, time online. In 2020, 65.4 million images and video files of CSAM were reported to the National Center for Missing and Exploited Children’s (“NCMEC”) CyberTipline, the highest number of reports ever received in a single year.⁴

The trauma stemming from child sexual abuse and exploitation is complex and individualized, and it impacts victims throughout their lifetimes:⁵

- Childhood trauma, including CSAE, can have **devastating impacts on a child’s brain**,⁶ including disrupted neurodevelopment; impaired social, emotional, and cognitive development; psychiatric and physical disease, such as post-traumatic stress disorder (PTSD)⁷; and disability.⁸
- Child sexual abuse victims suffer an **increased risk of suicide**—in one study, female survivors were two to four times more likely to attempt suicide, and male survivors were four to 11 times more likely to attempt suicide.⁹
- Child sexual abuse leads to an increased risk of **negative outcomes across the lifespan**, such as alcohol problems, illicit drug use, depression, marriage issues, and family problems.¹⁰

B. Child Sexual Abuse Victims Commonly Delay Disclosure of Their Abuse for Decades

Many victims of CSAE suffer in silence for decades before they talk to anyone about their traumatic experiences. As children, child sexual abuse victims often fear the negative repercussions of disclosure, such as disruptions in family stability, loss of relationships, or involvement with the authorities.¹¹ Additionally, survivors may struggle to disclose because of trauma and psychological barriers such as shame and self-blame, as well as social factors like gender-based stereotypes or the stigma surrounding victimization.¹²

Moreover, disclosure of CSA to the authorities for criminal prosecution or an attorney in pursuit of civil justice is a difficult and emotionally complex process, which involves the survivor knowing that he or she was abused, being willing to identify publicly as an abuse survivor, and deciding to act against their abuser. In light of these barriers to disclosure, it is not surprising that:

- In a study of survivors of abuse in Boy Scouts of America, **51%** of survivors disclosed their abuse for the first time at **age 50 or older**.
- An estimated **70%** of child sexual assault victims **never contact police** to report abuse.
- **One-third** of child sexual abuse survivors **never report** their abuse to anyone.

For both children and adults, disclosure of CSAE trauma is a process and not a discrete event in which a victim comes to terms with their abuse.¹³ To effectively protect children from abuse, SOL laws must reflect this reality.

II. SOL Reform Serves the Public Good by Giving Survivors Access to Justice and Preventing Future Abuse

Historically, a wall of ignorance and secrecy has been constructed around child sexual abuse, which has been reinforced by short SOLs that kept victims out of the legal system. Short SOLs for CSAE play into the hands of the perpetrators and the institutions that cover up for them; they disable victims’ voices and empowerment and leave future children vulnerable to preventable sexual assault.

CHILD USA is leading the vibrant national and global movement to eliminate civil and criminal SOLs and revive expired civil claims as a systemic solution to the preventable CSAE epidemic.¹⁴ **There are three compelling public purposes served by the child sexual abuse SOL reform movement**, which are explained in the graphic below:

HOW STATUTE OF LIMITATIONS REFORM HELPS EVERYONE

Identifies Hidden Child Predators and the Institutions that Endanger Children
to the public, shielding other children from future abuse.

Punishes Bad Actors & Shifts the Cost of Abuse
from the victims and taxpayers to those who caused it.

Prevents Further Abuse
by educating the public about the prevalence, signs, and impact of child sex abuse so that it can be prevented in the future.

A. SOL Reform Identifies Hidden Child Predators and Institutions that Endanger Children

It is in society's best interest to have CSAE survivors identify hidden child predators to the public—whenever the survivor is ready. The decades before public disclosure give perpetrators and institutions wide latitude to suppress the truth to the detriment of children, parents, and the public. Some predators abuse a high number of victims and continue abusing children well into their elderly years. For example, one study found that 7% of offenders sampled committed offenses against 41 to 450 children, and the highest time between offense to conviction was 36 years.¹⁵ SOL reform helps protect Ohio's children by identifying sexual predators in our midst. By allowing claims for past sexual extortion to be brought to court, hidden predators are brought into the light and are prevented from further abusing more children in Ohio.

B. SOL Reform Punishes Bad Actors and Shifts the Cost of Abuse

CSAE generates staggering costs that impact the nation's health care, education, criminal justice, and welfare systems. The estimated lifetime cost to society of child sexual abuse cases occurring in the US in 2015 is \$9.3 billion, and the average cost of non-fatal per female victim was estimated at \$282,734. Average cost estimates per victim include, in part, \$14,357 in child medical costs, \$9,882 in adult medical costs, \$223,581 in lost productivity, \$8,333 in child welfare costs, \$2,434 in costs associated with crime, and \$3,760 in special education costs. Costs associated with suicide deaths are estimated at \$20,387 for female victims.¹⁶

It is unfair for the victims, their families, and Ohio taxpayers to be the only ones who bear this burden; this bill levels the playing field by imposing liability on the ones who caused the abuse and alleviating the burdens on the victims and taxpayers. Further, if this revival law is passed, Ohio could gain millions of dollars in revenue from Medicaid reimbursements as a result of the settlement funds and damages awards that survivors recover.

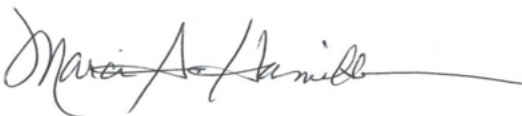

C. SOL Reform Prevents Further Abuse

SOL reform also educates the public about the dangers of CSAE and how to prevent it. When predators and institutions are exposed, particularly high-profile ones like Larry Nassar, Jeffrey Epstein, the Boy Scouts of America, and the Catholic Church, the media publish investigations and documentaries that enlighten the public about the insidious ways child molesters operate to sexually assault and exploit children.¹⁷ By shedding light on the problem, parents and other guardians are better able to identify abusers, while the public is empowered to recognize grooming and abusive behavior and pressure youth serving organizations to implement prevention policies to report abuse in real time. Indeed, CSAE publicity creates more social awareness to help keep kids safe, while also encouraging institutions to implement accountability and safe practices.

III. Conclusion

I commend you for supporting this legislation, which is desperately needed to validate survivors of CSAE and protect Ohio's children from preventable sexual abuse and extortion. Reviving expired sexual extortion claims is a positive step for Ohio's children and families. For more information about SOL reform, visit childusa.org/sol/ or email info@childusa.org. Please do not hesitate to contact us if you have questions regarding SOL reform or if we can be of assistance in any way on other child protection issues.

Sincerely,

Marci A. Hamilton, Esq.
