

**TO:** Honorable Members of the House Judiciary Committee

**FROM:** Marci Hamilton, Founder & CEO, CHILD USA; Professor, University of Pennsylvania, and Kathryn Robb, Executive Director, CHILD USA Advocacy

**RE:** Missouri HB367: Extending the civil SOL for sexual abuse of minors to age 55 and opening a 2-year revival window for expired claims against all defendants.

**DATE:** February 13, 2023

---

Dear Honorable Members of the House Judiciary Committee,

Thank you for allowing us to submit testimony in support of HB 367, which will extend the statute of limitation (“SOL”) for child sexual abuse (“CSA”) to age 55 and open a 2-year revival window for expired claims against all defendants. This legislation will not only bring long overdue justice to survivors, but it will also greatly reduce the present danger to Missouri’s children by exposing hidden predators who are still abusing children today.

By way of introduction, Professor Marci Hamilton is a First Amendment constitutional scholar at the University of Pennsylvania who has led the national movement to reform statutes of limitations to reflect the science of delayed disclosure of childhood sexual abuse. She is also the founder & CEO of CHILD USA, a national nonprofit think tank devoted to ending child abuse and neglect. Kathryn Robb is the Executive Director of CHILD USA Advocacy, an advocacy organization dedicated to protecting children’s civil liberties and keeping children safe from abuse and neglect. Kathryn is also an outspoken survivor of child sexual abuse.

**I. Research on Trauma and Delayed Disclosure Supports SOL Reform for Child Sexual Abuse**

**A. There is a Nationwide Epidemic of CSA Causing Lifelong Damage to Victims**

Currently, more than 10% of children are sexually abused, with at least one in five girls and one in thirteen boys sexually abused before they turn 18.<sup>1</sup> CSA is a social problem that occurs in all social groups and institutions, including familial, religious, educational, medical, and athletic. Nearly 90% of CSA perpetrators are someone the child knows; in fact, roughly one third of CSA offenses are committed by family members.<sup>2</sup>

The trauma stemming from CSA is complex and individualized, and it impacts victims throughout their lifetimes:<sup>3</sup>

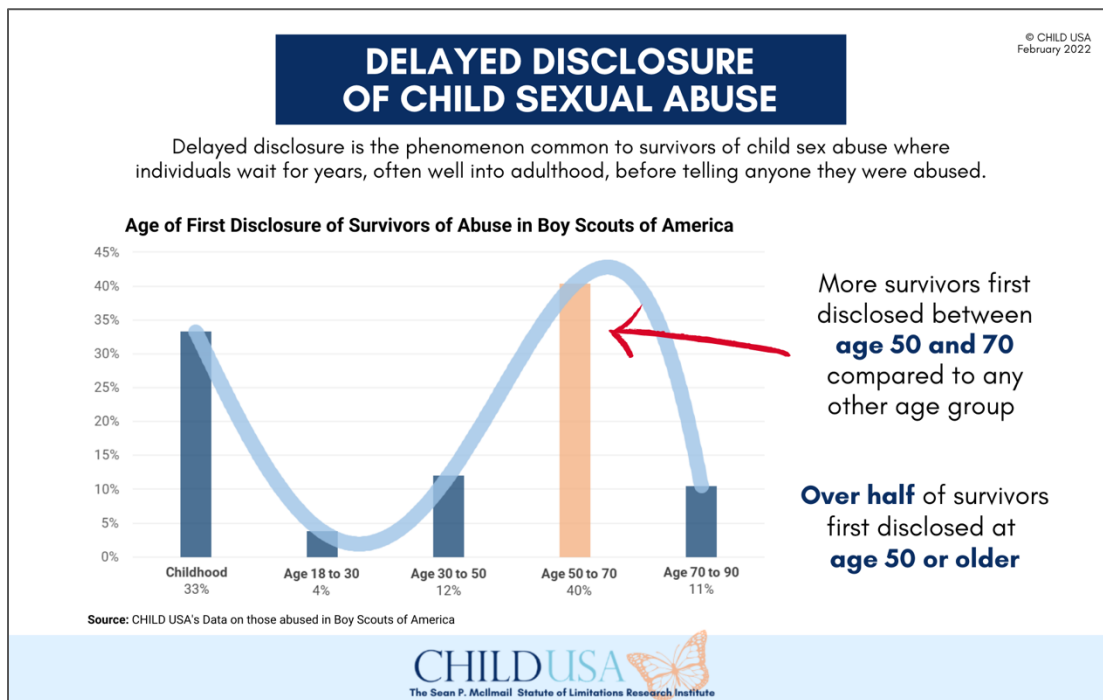

- Childhood trauma, including CSA, can have **devastating impacts on a child’s brain**,<sup>4</sup> including disrupted neurodevelopment; impaired social, emotional, and cognitive development; psychiatric and physical disease, such as post-traumatic stress disorder (PTSD)<sup>5</sup>; and disability.<sup>6</sup>

- CSA victims suffer an **increased risk of suicide**—in one study, female CSA survivors were two to four times more likely to attempt suicide, and male CSA survivors were four to 11 times more likely to attempt suicide.<sup>7</sup>
- CSA leads to an increased risk of **negative outcomes across the lifespan**, such as alcohol problems, illicit drug use, depression, marriage issues, and family problems.<sup>8</sup>

## B. CSA Victims Commonly Delay Disclosure of Their Abuse for Decades

Many victims of CSA suffer in silence for decades before they talk to anyone about their traumatic experiences. As children, CSA victims often fear the negative repercussions of disclosure, such as disruptions in family stability, loss of relationships, or involvement with the authorities.<sup>9</sup> Additionally, CSA survivors may struggle to disclose because of trauma and psychological barriers such as shame and self-blame, as well as social factors like gender-based stereotypes or the stigma surrounding victimization.<sup>10</sup> Further, many injuries resulting from CSA do not manifest until survivors are well into adulthood. These manifestations may coincide with difficulties in functioning and a further delay in disclosure of abuse.

Moreover, disclosure of CSA to the authorities for criminal prosecution or an attorney in pursuit of civil justice is a difficult and emotionally complex process, which involves the survivor knowing that he or she was abused, being willing to identify publicly as an abuse survivor, and deciding to act against their abuser. In light of these barriers to disclosure, it is not surprising that:

- In a study of survivors of abuse in Boy Scouts of America, **51%** of survivors disclosed their abuse for the first time at **age 50 or older**.
- **One-third** of CSA survivors **never report** their abuse to anyone.

For both children and adults, disclosure of CSA trauma is a process and not a discrete event in which a victim comes to terms with their abuse.<sup>11</sup> To effectively protect children from abuse, CSA laws must reflect this reality.

## **II. SOL Reform Serves the Public Good by Giving Survivors Access to Justice and Preventing Future Abuse**

Historically, a wall of ignorance and secrecy has been constructed around CSA, which has been reinforced by short SOLs that kept victims out of the legal system. Short SOLs for CSA play into the hands of the perpetrators and the institutions that cover up for them; they disable victims' voices and empowerment and leave future children vulnerable to preventable sexual assault.

There is a vibrant national and global movement to eliminate civil and criminal SOLs and revive expired civil claims as a systemic solution to the CSA epidemic.<sup>12</sup> **There are three compelling public purposes served by the child sexual abuse SOL reform movement**, which are explained in the graphic below:

## HOW STATUTE OF LIMITATIONS REFORM HELPS EVERYONE

**Identifies Hidden Child Predators and the Institutions that Endanger Children**  
to the public, shielding other children from future abuse.

**Shifts the Cost of Abuse**  
from the victims and taxpayers to those who caused it.

**Prevents Further Abuse**  
by educating the public about the prevalence, signs, and impact of child sex abuse so that it can be prevented in the future.

### **A. SOL Reform Identifies Hidden Child Predators and the Institutions that Endanger Children**

It is in society's best interest to have victims come forward and identify hidden child predators to the public—whenever they are ready. The decades before public disclosure give perpetrators and institutions wide latitude to suppress the truth to the detriment of children, parents, and the public.

Some predators abuse a high number of victims and continue abusing children well into their elderly years. For example, one study found that 7% of offenders sampled committed offenses against 41 to 450 children, and the highest time between offense to conviction was 36 years.<sup>13</sup> SOL reform helps protect Missouri's children by identifying sexual predators in our midst. By extending, eliminating, and reviving short restrictive SOLs, especially allowing claims for past abuse to be brought to court, hidden predators are brought into the light and are prevented from abusing more children in Missouri.

## **B. SOL Reform Shifts the Cost of Abuse**

CSA generates staggering costs that impact the nation's health care, education, criminal justice, and welfare systems. The estimated lifetime cost to society of child sexual abuse cases occurring in the US in 2015 is \$9.3 billion, and the average cost of non-fatal per female victim was estimated at \$282,734. Average cost estimates per victim include, in part, \$14,357 in child medical costs, \$9,882 in adult medical costs, \$223,581 in lost productivity, \$8,333 in child welfare costs, \$2,434 in costs associated with crime, and \$3,760 in special education costs. Costs associated with suicide deaths are estimated at \$20,387 for female victims.<sup>14</sup>

It is unfair for the victims, their families, and Missouri taxpayers to be the only ones who bear this burden; this bill levels the playing field by imposing liability on the ones who caused the abuse and alleviating the burdens on the victims and taxpayers.

## **C. SOL Reform Prevents Further Abuse**

SOL reform also educates the public about the dangers of CSA and how to prevent it. When predators and institutions are exposed, particularly high-profile ones like Larry Nassar, Jeffrey Epstein, the Boy Scouts of America, and the Catholic Church, the media publish investigations and documentaries that enlighten the public about the insidious ways child molesters operate to sexually assault children and the institutional failures that enabled their abuse.<sup>15</sup> By shedding light on the problem, parents and other guardians are better able to identify abusers and responsible institutions, while the public is empowered to recognize grooming and abusive behavior and pressure youth serving organizations to implement prevention policies to report abuse in real time. Indeed, CSA publicity creates more social awareness to help keep kids safe, while also encouraging institutions to implement accountability and safe practices.

## **III. Missouri Should Join the National Trend Toward SOL Reform for CSA**

The SOL reform trend for states is to eliminate civil and criminal SOLs and revive expired civil claims—like Vermont, Maine, Guam and NMI have already done. In fact, two dozen states across the U.S. and two territories have revival laws giving survivors an opportunity to file claims for decades old abuse that were previously blocked by short SOLs.

The proposed civil SOL extension and revival-window is in line with the trend of giving victims more time to come forward, consistent with the science of trauma and disclosure of abuse.

### **A. Missouri Should Extend the Civil SOL for CSA and Pass A Revival-Window for Previously Expired Claims**

With HB 367, Missouri can remove barriers to justice for victims of sexual abuse, including children and individuals who were disabled at the time of abuse. As shown below, Missouri is lagging behind other states with its short SOL for civil claims. For claims against perpetrators, victims have the latter of age 31 or 3 years after discovering their injuries to file a civil claim. Missouri's SOL is even shorter for claims against other defendants: the latter of age 26 or 5 years after discovery. This civil SOL extension and revival-window bill is in line with the national trend to give victims more time to come forward in accordance with the science of trauma that can delay disclosure of abuse.

Yet here is only one way to restore justice to Missouri's sexual abuse survivors blocked from pursuing their claims by unfairly short SOLs—to revive their expired civil claims. Two-dozen states across the U.S. and three territories have opened revival laws giving survivors an opportunity to file claims for decades old abuse that were blocked by short SOLs. The states that have revived expired civil SOLs have gained valuable information about hidden child predators and the institutions that harbored them, enabling them to better empower victims. These revival laws do not yield a high number of cases, but instead provide long-overdue justice to adult victims of child sexual abuse.

HB 367 would open a 2-year revival window for expired claims against all defendants; this legislation would remove barriers to justice for countless victims and give them the time they need to do the legal and emotional work necessary to revisit their childhood traumas and coordinate with attorneys to file their cases. If there is sufficient evidence to prove civil liability, the mere passage of time should never prevent victims from accessing justice.

#### IV. Conclusion

Once again, we commend you for taking up this legislation, which is desperately needed to validate adult survivors of CSA and protect Missouri’s children from future abuse. Extending the civil SOL and creating revival window for expired claims is a positive step for Missouri’s children and families.
